- 3. TVC shall decide about vending zones considering an intensity of foot falls, Road width and vehicular & pedestrian movement for the city.

However, there will not be any restriction on mobile vending in this area if vendors continuously move without affecting traffic and commuter movements. In such cases the TVC will decide the total number of such mobile vendors that can be accommodate after taking into account the area of significant footfall and 1/3rd of the holding capacity of the area. Otherwise there is every chance of mobile vending itself creating problem for the traffic movement, as the mobile vending invariably takes place from the carriage way.

and above.

- e. Such stationary vending will be allowed after taking the clearance from traffic police regarding the smooth vehicular and pedestrian movement. If required, road side parking shall be banned in such area where street vending is allowed.
